

DENVER WATER
Sr. Applications Developer
Data Warehouse and Business Intelligence

IT Sr. Applications Developer

Hiring Annual Salary Range: \$65,976 to \$92,844

Denver Water is recruiting an IT Sr. Applications Developer to support Data Warehouse and Business Intelligence Program initiatives. The BI Program is a medium -scale, multi-user business intelligence environment with growing demands. Candidate should possess specialized technical knowledge and skills related to contemporary business intelligence software tools, platforms and database administration. Ability to communicate effectively both orally and in writing is required. Excellent research and problem solving skills are also required.

Position requirements include graduation from a four-year college or university with a degree in computer science or a related field or equivalent education. Also requires a minimum of six years experience using contemporary computing environments applying in-depth knowledge to develop specific business requirements and objectives, understand data models, and architect, design and develop software applications using business intelligence tools and platforms to meet business needs. Candidates should possess knowledge of:

- (1) Extract/Transform/Load (ETL) tools and OLAP software, using an Oracle RDBMS.
 - (2) Experience with two or more of the following programming languages SQL, T-SQL, PL/SQL, Java, JSP, JavaScript, Visual Basic, PHP, CGI:Perl, HTML, XML.
- Other desired knowledge, skills and abilities: Congos PowerPlay, Cognos ReportNet and Informatica.

All employment offers are contingent on the completion of a post-offer physical including a drug screen. A background check is also conducted to verify information submitted on the application. Candidates **MUST** submit a completed Denver Water application in order to be considered - resumes are not accepted in lieu of an application. Applications will be accepted until a sufficient number are received. Please apply online at www.denverwater.org or in person at:
